Re: University Teknologi Petronas, Malaysia

As the Project Architect and during my tenure as the Project Director of the Foster and Partners Malaysian Office, I am pleased to recommend LWC Precast Sdn Bhd for its Architectural Cladding works undertaken at the University Teknologi Petronas.

During the course of the project, I have been personally involved with LWC Precast Sdn Bhd from the design stage all the way through to completion of the external cladding package. As such, I have observed that LWC is competent and professional in implementing its work.

LWC in my opinion has carried out its work successfully and was able to meet the high standards and stringent requirements stipulated for the project. Based on my experience working with LWC Precast Sdn Bhd, I have no hesitation to recommend them as a capable and quality conscious specialist subcontractor.

Yours sincerely
