TO WHOM IT MAY CONCERN

Lightweight Concrete Pte Ltd have been known to us since 1980's. They are the pioneers of pre-cast, pre-finished light-weight concrete in Singapore.

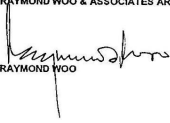

Its innovations on concrete weight reduction together with their ability to adapt its usage to create major building components ie. walls, windows, roofs and finishes is worth considering.

Their performance with us have been excellent in 78 Shenton Way. Although their work was confined to the podium; their quality have been good and we find this company a very co-operative and ever willing to make test and mock-ups.

We wish them the best for the future.

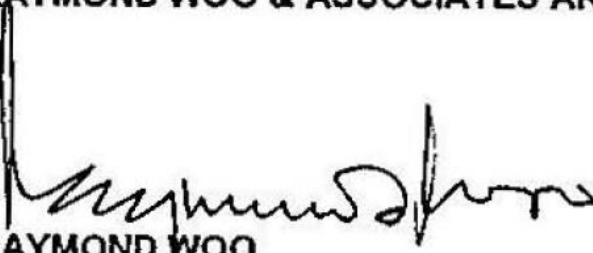

Thank you.

Yours faithfully
